Gas Detection for Use with Air-sampling Smoke Detection

Xtralis, the manufacturer of the market leading VESDA air-sampling smoke detection (ASD) technology, has developed the industry’s first multi-hole aspirated gas detector.

When added to any new or existing VESDA installation, VESDA ECO provides the industry’s first combined aspirated smoke and gas detection system.

VESDA ECO provides early warning of toxic, oxygen and flammable gas hazards to protect personnel and property while ensuring business continuity.

Applications include:
- Battery charging rooms
- Boiler plant rooms
- Commercial kitchens
- Parking garages
- Utility / service tunnels
- Refrigerated stores and plant rooms
- Water treatment and sewerage plants
- Power generation plants
- Metal processing plants
- and more...

How It Works

VESDA ECO uses an existing or new VESDA air-sampling pipe network to actively monitor for gas escapes and build-ups.

Each ECO gas detector can house up to two gas sensors, and additional detectors can be added easily to the VESDA pipe network to monitor more gases if required. Pre-calibrated sensor cartridges are easily replaced in the field and make converting to different gas sensors or replacing sensors a simple task.

The VESDA ECO detector is configured using Xtralis VSC configuration software and can be remotely monitored using Xtralis VSM4 monitoring software. Both VSC and VSM can be used to download data from the on-board memory card for data analysis and trending of historical data.

Integration with other building systems, including fire alarm control panels, PLCs, HVAC and building management systems, provides real-time situational awareness for intelligent emergency response.

VESDA ECO by Xtralis provides significant installation and routine maintenance cost savings over conventional multi-point gas detection solutions, by reducing the number of detectors required to cover an area and by providing easy access for routine maintenance.

Hazardous area certified variants of VESDA ECO are available (Approval pending).

Features

- Toxic, Oxygen or Flammable gas detection
- Single- or dual-gas versions
- Factory calibrated sensor cartridges
- Integral alarm status LEDs
- Integrates with PLCs/HVAC/BMS/FACP
- Configurable relays
- 4-20 mA analog outputs
- RS485 Modbus output
- On-board event logging
- On-board fault diagnostics
- Integral gas test port
- Remote reset

Approvals

CE
- Conforms to ANSI/UL Std 61010-1
- Certified to CAN/CSA Std C22.2 No. 61010-1
- EN 61010-1

EMC:
- FCC 47CFR Part 15B class B
- ICES 003
- EN 50270

Others:
- LCPB, VdS, AFNOR compatible for use with Xtralis EN54-20 approved ASD
- LOM approved to UNE 23300 (CO & CO+NO₂)
- AQISQ – CMC Pattern Approval
- CCCF – CFE, GB:15322.1
- VNIPO
- Hazardous area, ATEX, ANSI/ISA, CSA (pending)

1) Consult with Protectowire if application requires removal of interferent gases.
VESDA ECO Detector

VESDA ECO gas detectors come complete with the main housing, sensor cartridge, data storage card and USB interface cable. Two variants are available based on detector outputs:

Part number structure: ECO-D-X-AA-BB
Select output option, replace X with either:
B  Relays, and analog and serial outputs
R  Relay and analog outputs only (not approved for US markets)

Single Gas Units
Replace AA with the relevant gas type number below and remove BB:
11  Hydrogen (H₂) 0-100% LFL
12  Methane (CH₄) 0-100% LFL
13  Propane (C₃H₈) 0-100% LFL
14  Hydrogen (H₂) 0-2000 ppm
15  Gasoline Vapour 0-100% LFL
16  Pentane (C₅H₁₂) 0-100% LFL
19  Ammonia (NH₃) 0-100% LFL
20  Alcohols 0-100% LFL
31  Oxygen depletion only (O₂) 0-25% v/v
32  Oxygen depletion & enrichment (O₂) 0-25% v/v
41  Carbon Monoxide (CO) 0-500 ppm
42  Ammonia (NH₃) 0-100 ppm
43  Hydrogen Sulphide (H₂S) 0-100 ppm
44  Sulphur Dioxide (SO₂) 0-10 ppm
45  Nitrogen Dioxide (NO₂) 0-10 ppm
47  Chlorine (Cl₂) 0-20 ppm
49  Carbon Dioxide (CO₂) 0-5% v/v

Dual Gas Units
Select one of the available combinations below. Replacing AA and BB with the preferred combination. Other combinations are available upon request:
11 – 31 Hydrogen and Oxygen
12 – 31 Methane and Oxygen
12 – 41 Methane and Carbon Monoxide
12 – 43 Methane and Hydrogen Sulphide
13 – 31 Propane and Oxygen
31 – 41 Oxygen and Carbon Monoxide
41 – 43 Carbon Monoxide and Hydrogen Sulphide
41 – 45 Carbon Monoxide and Nitrogen Dioxide

Example:  ECO-D-B-12-41
An ECO detector with relay, analog and serial outputs for Methane and Carbon Monoxide.

Replacement sensor cartridge part number structure: ECO-SC-AA-BB
Where SC = Sensor Cartridge, AA-BB are 1st and 2nd gas types (see above).

Installation
VESDA ECO is designed to press-fit on to VESDA air-sampling pipe work. To fit VESDA ECO simply remove a 60 mm section of pipe when using 25 mm OD air-sampling pipe work or 4" for ¾” BSP pipe.

VESDA ECO provides total flexibility to install one or more detectors anywhere on the pipe network to enable monitoring of a specific point, zone or total area.
